The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service

Sincerely,

Walter E. Gurley

Also, twice now MCI has convinced us to switch to a special deal they had and then we find charges on our bill that we were specifically told would not be applicable. We and other consumers need protection from this type of scam. Have you ever tried to switch from MCI to another carrier? It requires several phone calls. Please help.

Sincerely,

Walter R. Lique

I am writing to you begging you to make other telephone companies provide their own facilities. My husband is a blue-collar worker for SBC and he is about to lose his job if something doesn't happen fast. SBC can not afford to continue to maintain lines and facilities at such reduced rates. That is why they have had to lay off thousands. My husband may be next. We have moved twice to keep his job but we are scared stiff. With the economy the way it is we need help. Please help let the issue pass. Make the other companies provide their own facilities. It is not fair for them to continue to make Bell go under.

Sincerely,

Wendi Fox
